Utkarsh Lakhotia

App Developer | Sound Designer | Web & AI/ML Specialist | 5+ Years in Delivering Innovative Solutions Across Industries
Prayagraj, Uttar Pradesh, India

Summary

I'm a developer and designer driven by a deep passion for technology, creativity, and innovation. My work blends technical precision with design thinking building digital products that are both functional and visually engaging. I enjoy exploring the intersection of development and design, whether it's through creating immersive experiences, intelligent systems, or modern applications that solve real problems.

I have a strong foundation in programming, game and app development, and visual design. I love bringing ideas to life from the first concept sketch to the final deployed product. I'm constantly experimenting, learning, and pushing my limits to deliver work that's thoughtful, impactful, and built with purpose.

For me, technology isn't just about code; it's about crafting experiences that connect people, inspire creativity, and move ideas forward.

Experience

Transcendi
Senior Software Engineer - Full Stack and AI Infrastructure
2024 - Present (2 years)
Edinburgh

Joined this company for a single project in the UK B2B market. Currently working on more than 5 projects as lead and learning and thriving. I have got a rich exposure of the foreign tech industry and got to know many things and industry standards. Diversified my skills set for different projects and managed my time accordingly. Learned new things and applied them in the process helping me reach the industry standards and ensuring my clients and company's best interest are reached on point

Freelancing
Freelance
June 2022 - August 2025 (3 years 3 months)

Worked as freelancer in different opportunities. I got a lot of rich experience from various people and companies at different roles. I got to know about the importance of communication skills and how to connect with people and understanding their needs. I connected, learned and developed many things with various people in diverse roles

Shadow Labs
Senior Developer
2020 - 2025 (5 years)

I started this company with my teammate . This company was to create and sell discord AI chatbots and other type of AI bots according to our customer needs. In this company i worked and learned as a python senior dev. I created different ML training sets and trained our own AI models

Insanity Crew
Web App Developer
June 2023 - August 2023 (3 months)
Rai Barely , Uttar Pradesh

I was given a freelance contract to build a web app. I built this app with proper backend , client-side and server-side micro-services and did a thorough security check for the application to make sure nothing is leaked and everything runs securely

SpyDown
Game Developer
2020 - 2021 (1 year)

I was at the position of Senior Game Developer in Unity and worked with many clients there and gained a lot of knowledge about this industry
